ABOUT ME

I've been actively developing mobile apps with Flutter since June 2020. I have developed more than 10 freelance mobile applications so far. I had the opportunity to publish more than 5 applications so far. As I am curious, I have developed 10+ web applications with Django and rest api with DRF. I also developed a web application with Java Spring Boot in microservice architecture. While developing this project, I used the following technologies. PostgreSQL, Docker, Redis, Elasticsearch, MongoDB.

EDUCATION AND TRAINING

18/08/2019 - CURRENT - City center / Elazığ, Elazığ, Turkey

Software Engineering

Firat Üniversitesi

firat.edu.tr

WORK EXPERIENCE

31/01/2022 - CURRENT - Elazığ, Turkey

Mobile Application Developer (Flutter)

Digital Transformation and Software Office at Firat University

In the digital transformation and software office, various applications belonging to Firat University are developed. Here, I have developed a mobile application that will allow students to see our university's news, announcements, and events in a single application, and that includes the map of the university. By choosing the student's own section, I added a special push notification feature to the section. I used the MVVM architecture when developing the application. If you're wondering about the structure I used in the project, you can check out my projects section.

30/09/2021 - CURRENT - Ankara, Turkey

Mobile Application Developer (Flutter)

Favrea

I worked with the team that released applications for both iOS and Android with Flutter. I write 40% of the application.

31/01/2020 - 31/10/2021 - Istanbul, Turkey

Web application developer

T3 Foundation

We have developed some web applications using Django and Django Rest Framework. I wrote sites that were previously written with html css js php with Django to be more useful. I also customized the admin panel for each of them.

26/04/2022 – CURRENT – Elazığ, Turkey

Freelance Mobile Applicaiton Developer (React Native)

Prodrom ICT Solution

In this company, I worked with the team that developed the application of Maltepe Municipality using React Native.

01/07/2022 – CURRENT – Ankara, Turkey

Software Engineering Compulsory Internship(Flutter)

Ryse Soft ICT

I did a mandatory summer internship in this company within the scope of university. I worked as a mobile application developer with Flutter at the company.

PROJECTS

31/01/2022 – 14/03/2022

Firat Mobile

<https://play.google.com/store/apps/details?id=edu.firat.firatMobile>

I used the MVVM architecture when developing the application. I used Mobx as state management and I used Provider as a helper tool. I added language support and dark theme support to the application. I saved the data I got from the api in local storage with the Cache manager I wrote myself so that it can be used without an internet connection. I used Dart Isolate where necessary.

For teaser: <https://www.youtube.com/watch?v=f17Xm2czA0U>

09/11/2021 – 31/01/2022

Favrea

<https://favrea.com/>

We used the MVC architecture when developing the application. We used GetX as state management. We added language support to the application. Soon in stores.

01/06/2020 – CURRENT

Freelance Projects I've Worked On

Favrea - Social Media

Motovar - E-commerce

Maltepem - Services Application

TrendMap - Social Media and E-commerce

SplitZing - Talent - Company app...
